

## Environmental Policy

As a growing energy group, we recognise our responsibility to minimise environmental impacts and contribute to sustainable energy development. We are committed to operating in a way that uses natural resources responsibly, reduces waste, and supports the transition toward cleaner energy solutions. We aspire to adopt sustainable practices and continually improve our environmental performance, understanding that this is an ongoing journey.

Our approach guided by the following principles:

- **Sustainable operation:** We seek to minimise emissions, waste, and resource consumption across all our activities.
- **Compliance and responsibility:** We adhere to applicable environmental laws, regulations, and industry best practices.
- **Culture and awareness:** We promote environmental responsibility and awareness among employees, partners, and stakeholders.
- **Transparent reporting:** We provide clear and timely information on our environmental performance and initiatives.
- **Continuous improvement:** We actively explore new technologies and methods to enhance energy efficiency and reduce environmental impact.

Through these principles, we aim to support sustainable energy development, preserve natural resources, and strengthen the Group's reputation as a responsible energy provider.

LIM CHENG TEN  
Managing Director
